

Unifying Communications Simpler - Faster - More Efficient

MODCOMS
VOICE DATA MOBILITY

Our Company

We at Modcoms Voice Data Mobility strive to be recognized as a leading Information and Communication Technology (ICT) organization. Since being established in 1979, and with over 30 years experience, we continue to evolve as an organization with the convergence of Voice, Data and Mobile technology and applications. Offering specialized Account Management, Project

Management, skilled Technical Resources and superior Customer Support Services. We deliver innovative solutions through our strategic partners Telstra, Mitel, Aastra, Panasonic, Microsoft and HP - tailoring these solutions for the SME and Enterprise market.

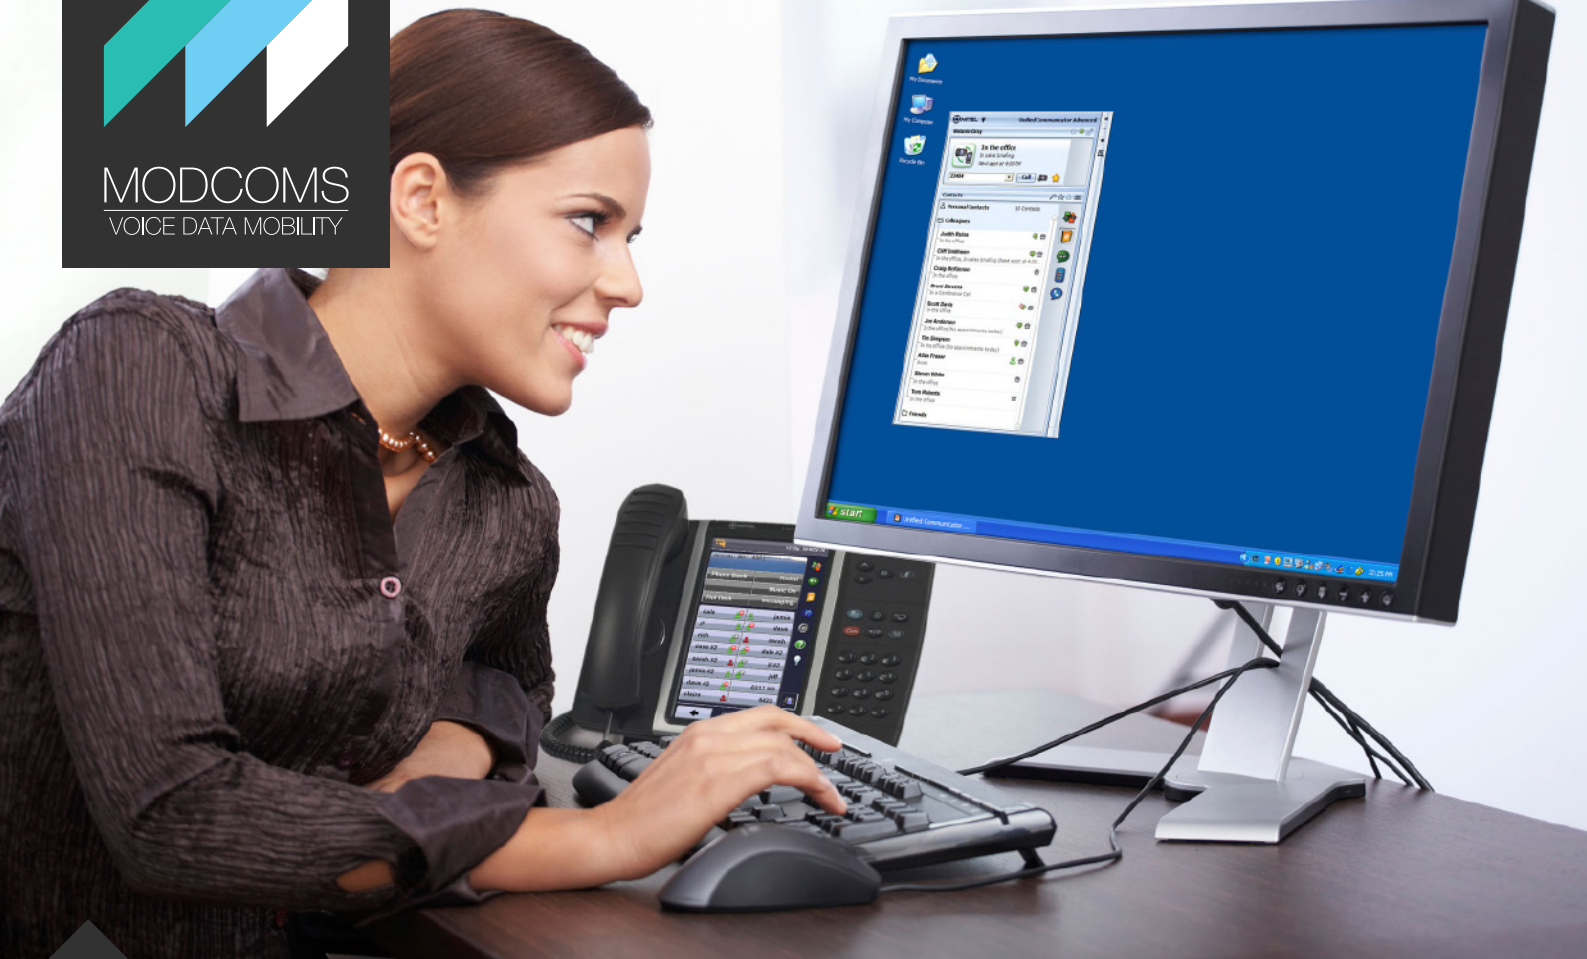

We are able to deliver these services by taking the time to understand how our current and potential customers operate, discovering what their needs and wants are and

provide them with a solution to improve the way their business functions and operates. This often results in improved productivity, functionality and a reduction in operating costs and therefore an increase in profitability. Our company's intention is to develop a long term partnership with our clients by providing proactive account management.

VOICE DATA MOBILITY

Our Solutions

Voice

In the evolving world of technology, it's imperative you are working with the right solutions partner, irrespective of your organization's size or industry. Your communications solution is the corner stone of your business. Modcoms Voice Data Mobility will propose the right solution platform, to suit your requirements which will grow with your company with technology such as VoIP Telephony, PBX or Key systems.

With the emergence of telephony applications - Remote Working, Unified Communications, Call Centres, Audio / Web Conferencing, Call Recording, Presence and Availability apps, these solutions can be used as business tools that may separate your organization from its competitors.

Data

Modcoms Voice Data Mobility specialize in delivering IT services to businesses no matter what your specific requirements are. We provide network design, implementation and managed support services. We understand that it is essential for businesses of all sizes to have access to a fast, reliable and secure IT Network. It's not only essential to have a modern, well managed information system but one that also delivers real benefits to your organization by enhancing productivity and processes, allowing access to relevant, critical information anywhere / anytime.

Out Sourcing the administration and management of your Corporate Network can be an Essential Key to Your Business Success.

Mobility

No longer does the location determine your productivity and efficiency.

Remote and Mobile workers can stay connected and in contact with your company and its clients by integrated solutions with your Voice and IT communication systems. Advancements in Mobile Broadband, IP Networks and Voice services provide the source to enable your staff to work and perform just as though they were in the office.

Whole of Business Telstra Accredited Partner

Does your business have the best possible call plan account or call rates for your mobile phone fleet, fixed line or mobile and fixed broadband? Are you taking advantage of all the options available; FREE Mobile to Mobile fleet calls, FREE fixed line calls to your Mobile Fleet Workforce, the correct data plan and speeds for your fixed and mobile broadband connection or connecting your Multi Sites through a reliable Next IP data network?

Modcoms Voice Data Mobility are a Whole of Business Telstra Accredited Partner, our Account Managers can advise your business on the right Voice, Data and Mobile plans and services for your organization. This will enable your business to receive the best value for money, productivity and efficiency from its technology.
